Phone: 387-7171 (Area Code 202)

Cable Address: Advancesci, Washington, D. C.

Dear Member:

Your AAAS membership is due for renewal. You can keep it active and continue to receive Science and the quarterly AAAS Bulletin without interruption if you return the enclosed renewal card now, together with your check for \$12.00 for another year's dues.

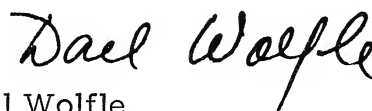

Have you examined recent issues of Science closely? The editor, Philip H. Abelson, and his staff have strengthened Science both qualitatively and quantitatively. Carefully reviewed articles and technical reports, book reviews, and reports of research conferences appear promptly.

Many Science readers turn first to the section on News and Comment for the weekly columns of D. S. Greenberg, John Walsh, Luther Carter, Bryce Nelson, and Philip Boffey, who report and analyze governmental and other activities that affect scientific research and education.

AAAS is engaged in a major effort to improve science teaching in the elementary grades, continues to publish annotated lists of science books for children and young adults, publishes Science Books: A Quarterly Review, and, in general, continues to serve as the nation's largest interdisciplinary scientific society. Our 135th meeting is scheduled for December 1968 in Dallas.

We hope you agree that this broad program of activities merits the support your continued membership will give it, and that when you review the value you get from receiving Science every week and being a member of AAAS you will decide that you can't afford to let your membership lapse. Send in the renewal and it will continue.

Sincerely,

Dael Wolfle  
Executive Officer

ADVANCEMENT OF SCIENCE

## GENERAL INFORMATION

Dues and subscription notices are sent three months in advance of the membership/subscription year. Please **pay** promptly to insure uninterrupted receipt of *Science*.

**LIFE MEMBERSHIP**

Life memberships in the AAAS are available for \$250 (\$175 for persons over 60).

## SCIENCE

Science is the leading weekly scientific magazine for reporting original research in all fields of science, and is one of the journals most frequently cited in the world's scientific literature. Consisting of articles, short technical reports, editorials, book reviews, letters to the editor, scientific meeting announcements and reports, and news and comment on science and public affairs, Science keeps its readers authoritatively informed on up-to-date findings in all fields of science.

## EXPLANATION OF KEYLINE

M60 = member since 1960; D= dues paid through December (in this position in the keyline, 1-9 = Jan. - Sept., O = Oct., N = Nov.); GF = section preference: botany and zoology; F = Fellow.

**N D = Nonmember subscription expiring December**

## AAAS SECTIONS

- A=Mathematics  
B=Physics  
C=Chemistry
